

Reel Handling

OVERVIEW

Andron reel grippers offer a productive and ergonomic solution for handling roll product of all weights and sizes. Grippers can be supplied to suit our range of standard manipulators, or as part of a bespoke lifting device.

- Grippers available for wire rope, mast and parallel arm manipulators
- Bespoke lift devices available
- Heavy lift solutions up to 1500kg SWL
- Working height ranges up to 2000mm
- Reach up to 4500mm
- Configurations to suit floor or crane mounting
- Compatible with our light crane systems

Our range of reel handling devices is engineered to provide reliable ergonomic handling and manipulation of multiple product weights and dimensions.

Modular standard designs can be easily adapted to suit our full range of different lifting devices including mast, parallel arm and wire rope assistors.

If a standard product doesn't suit your application our engineering team can rapidly develop and certify bespoke solutions for any handling problem.
